

ZHUMIKOV YEGOR

Phone number: +7 (999) 520-7092

yegor@yogurtthehor.se

Saint-Petersburg, Russia

EDUCATION

Bachelor	ITMO University, Software Engineering Programming and information systems	2017-now
-----------------	--	----------

WORK EXPERIENCE

Freelance, Bot developer, Remote

2016-2018

Developed a lot of commercial bots for small and big companies. Most of them are working under Telegram, but I developed own framework to easily connect any bot to any social network or messenger, including Facebook, Telegram, Russian social network VK and others.

Infotecs, Full-stack C# developer, Saint-Petersburg

2018-now

Working in an internal department and developing corporate tools. We use angular and react for frontend. For backend we use ASP.NET Core. Our favorite database is MongoDB, but a few projects are using Microsoft Database for now.

Freelance, Python backend developer, Remote

2019-now

Primary for “NTI Platform” I design and develop backend by my-self, sometimes with a small team.

PUBLIC PROFESSIONAL ACTIVITY

Have a few publications on Habr. Most of them are connected with GameDev, especially Love2D engine. Topics of them are: tutorials, advanced uses and connecting framework with native code as C or Java.

My public repositories can be found on a GitHub — <https://github.com/YogurtTheHorse>.

LANGUAGES

Russian – mother tongue

Ukrainian – advanced level

English – advanced level
